Dear Henri:

All the New York differences of opinion prove is that there are some very poor critics in that city. I have been complaining about this for a long time. It is part of the ancient problem that evolves when people are engaged for a profession without having to prove specific credentials for the job first. In the case of the Philharmonic, either one camp was right or the other was. The points in question do not involve taste or interpretation.

All best,

*Martin*
