An Addendum on
Exposure to unpredictability and mental health: Validation of the brief version of the Questionnaire of Unpredictability in Childhood (QUIC-5) in English and Spanish

Due to requests for the items, instructions, and scoring information used in this study, the authors have now provided this material as Supplementary Datasheet 1 which is now published alongside the original article.

In the published article, there were also errors in Table 1. Item 1, in English, stated “Before age 11, I had a bedtime routine (e.g., my parents tucked me in, my parents read me a book, I took a bath).” The correct statement is “Before age 12, I had a bedtime routine (e.g., my parents tucked me in, my parents read me a book, I took a bath).” Item 1, in Spanish, stated “Antes de los 11 años, tenía una rutina antes de acostarme a dormir (por ejemplo, mis padres me cobijaban, me leían un libro, yo tomaba un baño).” The correct statement is “Antes de los 12 años, tenía una rutina antes de acostarme a dormir (por ejemplo, mis padres me cobijaban, me leían un libro, yo tomaba un baño).” Item 3, in Spanish, stated “Uno de mis padres podía pasar en un instante de la calma al estrés y los nervios.” The correct statement is “Uno de mis padres podría pasar en un instante de la calma a la furia.” Item 4, in Spanish, stated “Mis padres tenían una relación estable.” The correct statement is “Mis padres tenían una relación estable entre ellos.” The corrected Table 1 and its caption appear below.
The authors apologize for these errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
