BACKGROUND: Students everywhere have been shocked by the change of classes being online. Our app is designed to provide a rich online learning environment, even when students are back in in-person classes. Our app provides a platform for teachers to stream lectures and communicate online to students with ease.

METHODS

1. We collected data about navigation of our interface through paper prototyping and interactive user testing.
2. Collected data from current students and adults 40+ years of age
3. 28 users tested

RESULTS

- Searching for live- stream
 - **Success Rate: 91%**
 - **Average Duration: 19 seconds**
- Profile creation
 - **Success Rate:**
 - **Average Duration:**

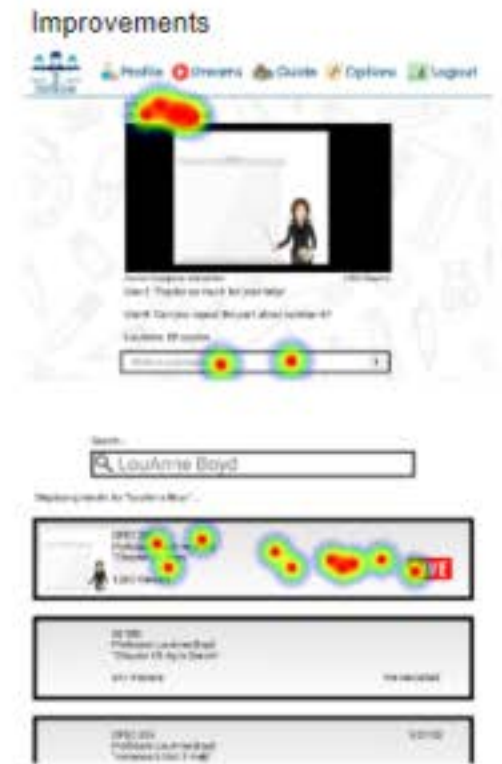

An interactive, easy to use platform increases student engagement with their studies.
