## Anderson Center Receives Award

**ORANGE, CA** The Association for University Business and Economic Research (AUBER) presented the A. Gary Anderson Center for Economic Research with the 2003 Award of Excellence for the Centers publication, the Economic & Business Review.

The Economic & Business Review is published semiannually by the A. Gary Anderson Center for Economic Research at the George L. Argyros School of Business & Economics and is provided to the public as an educational service. The Review includes a comprehensive set of historical economic data at the national, state and county levels. It also contains a forecast of economic activity for the United States, California, and Orange, Los Angeles and Riverside/San Bernardino counties. Articles written by Chapman faculty and guest lecturers relating to current economic and business issues with a particular emphasis on regional economic analysis are also presented in the Review.

AUBER, founded in 1947, is the professional association of business and economic research organizations in public and private universities. Its primary objective is to further basic and applied research in business, economics, and related public policy areas. Each year the association recognizes outstanding publication in the field of business and economic research published under the auspices of AUBER members. Past recipients were: The University of Montana, 2002; The University of Alabama, 2001; and the University of Arizona, 2000.
