Folks.

The snap is really great - we all look beamish, as you so aptly phrased it!

Here outside of campaiging Shindelletti's Clue peanut clusters with those we buy in bulk from Price Club no great intellectual events are occurring. I was away 10 days. Touching base in the East and when I got back yesterday Beverly (Va's sister) informed me she (Va) had to go into O2 to ease her shortness of breath and was in the hospital for a short stay. We still don't know how effective the therapy is, but signs are encouraging. However, the next 3-4 weeks will tell us more and until then, it is best to make no plans. Well phone for sure! I expect to get a solid reading on the next few weeks.

Va is in good spirits and is enjoying playing with the newborn we have installed to dispense the O2 when needed. The doc will be coming up with more ideas on therapy in the meantime. Onward & Upward!
Folks,

The snap is really great – we all look beamish, as you aptly phrase it!

Here outside of comparing Ghirardelli’s choc. Peanut cluster with those we buy in bulk from Price Club no great intellectual events are occurring. I was away 10 days. Touching base in the East and when I got back yesterday Beverly (Va’s sister) informed me she (Va) had to go into $O_2$ to ease her shortness of breath and was in the hospital for a short stay. We still don’t know how effective the therapy is, but signs are encouraging. However, the next 3-4 weeks will tell us more and until then it is best to make us plans. We’ll phone, for sure! I expect to get a solid reading in the next few weeks. Va is in good spirits and is enjoying playing with the [[one word]] we have installed to dispense the $O_2$, when needed: the doc will be coming up with more ideas for therapy in the meanwhile. Onward & Upward!

Yrs.

& Va
