### Comments

Due to the exact date of the letter being unknown an estimated date has been provided.

Folks - Emmy's note finally got forwarded to me down here where I have been having the cataract in the right eye sucked out and a lens implanted. In a few weeks I should have something approaching binocular vision (with glasses).

Emmy's bluet at the big skit doc in S.F. is certainly her prerogative. Unfortunately these days, there is more emphasis on technique (procedure) than empathy, altho it is clear that empathy is the whole thing in cases where there is no cure. Her letter, as the family surmised, probably will do little to change the doc's attitude, but who knows - it might shake him up a little.

I came down here to have this operation because Va's sister and brother in-law are all the family I have got to provide a backup for transport and convalescence. The operation is routine except in my case there had been some scarring of the right pupil from the iridectomy done 20 yrs ago to control glaucoma. So it will take somewhat longer for the eye to round into shape. I have to stay here probably another two weeks. By the time the dust has settled I will have to head to Bethesda to start the 6 mo. fellowship there, so it looks like any meeting before next October will have to be somewhere in the East. My address will be:

110 K  
Fogarty Scholar-in-Residence  
Strom Bldg, Suite 202, 9600 Rockville Pike  
Hall Inst Health  
Bethesda, Maryland 20192  
phone: (301) 496-4161

Maybe I'll get my own phone later. I'll write again from there.  
Carry on!

hope
