Dear Geks -

We have your card from S.F. with its intriguing mention of a "surprise" and also the fabulous chronicle of one H. Stonemsky. My father came from Stonin, as did an indeterminate and very large number of intellectuals who were numerous enough to form a Stonemvereen in N.Y. early in this century. Moreover, a very close friend of mine, Mr. Piotr Stonemsky - an adornment of French science and the authority in yeast genetics - also comes from there and may even be a relative - (he is wild enough to qualify as a genuine Stonemski) - so I was pre-conditioned to enjoy the New Yorker piece.

\* But to get back to Saturday, March 7 - Va is now on a fixed routine - 5 days in the hospital, + 23 days recovering. The doc was wrong about the toxicity. The regime is very effective but still highly toxic. Va got 5 bad inflammations - ulcerations in the mouth & nose bleeds - but these reactions can be tolerated with a liquid diet and last only 10 days of the 23 she has free

between treatments. So this puts a rigid limit on get-togethers for a while. She is slated to go back for treatment #3 March 10<sup>th</sup> a Monday. A good day would be Saturday Mar. 7<sup>th</sup>. Before that we are getting a ride down to La Jolla so Va. can enjoy an outing with family there and see her kittens. She gets back March 5<sup>th</sup> her sister drives us there and back for the visit March 2-4. On the 6<sup>th</sup> there will be a monitor X-ray to see how she is doing. Nothing happens on the 7<sup>th</sup>, but on the 8<sup>th</sup> I will go back to La Jolla to attend a memorial lecture in honor of an old friend Nathan Kaplan - and fly back on the 10<sup>th</sup> to escort Va. back to the hospital. After Mar. 16<sup>th</sup>, she is back on the Recovery bit again with another traumatic session which will probably keep her out of circulation until ~ March. 28. So, hopefully you are not busy March 7<sup>th</sup>!!

The treatments are very effective and Va's morale is high. She eats well and has lots of energy most of the time. I'll phone you sometime between March 5<sup>th</sup> and 7<sup>th</sup>.

YRS,  
r.

[[asterisk]] Saturday, March 7 [[1987]]

Dear Folks—

We have your card from S.F. with its intriguing mention of a “surprise” and also the fabulous chronicle of one N. Sloveinsky. My father came from Slovein, as did an indeterminate and very large number of intellectuals who were numerous enough to form a Slovenier verein in N.Y. early in this century. Moreover, a very close friend of mine, one Piotr Sloveinsky—an adornment of French science and the authority on yeast genetics—also comes from there and may even be a relative—he is wild enough to qualify as a genuine Sloveniski—so I was preconditioned to enjoy the New Yorker juice.

[[asterisk]] But to get back to Saturday, March 7—Va is now on a fixed routine—5 days in the hospital, & 23 days recovering. The doc was wrong about the toxicity. The regime is very effective but still highly toxic. Va gets bad inflammation—ulcerations in the mouth & nose bleeds—but these reactions can be tolerated with a liquid diet and last only ~10 days of the 23 she has free between treatments. So this puts a rigid limit on get-togethers for a while. She is slated to go back for treatment #3 March 10<sup>th</sup> a Monday. A good day would be Saturday Mar. 7<sup>th</sup>. Before that we are getting a ride down to La Jolla so Va. Can enjoy an outing with family there and see her kittens. She gets back March 5<sup>th</sup>—her sister drives us there and back for the visit March 2-4. On the 6<sup>th</sup> there will be a monitor x-ray to see how she is doing. Nothing happens on the 7<sup>th</sup>-, but on the 8<sup>th</sup> I will go back to La Jolla to attend a memorial lecture in honor of an old friend Nathan Kaplan—and fly back on the 10<sup>th</sup> to escort Va back to the hospital. After March 16<sup>th</sup>, she is back on the Recovery bit again with another traumatic session which will probably keep her out of circulation until ~March. 28. So, hopefully you are not busy March. 7<sup>th</sup>!!

The treatments are very effective and Va’s morale is high. She eats well and has lots of energy most of the time. I’ll phone you sometime between March 5<sup>th</sup> and 7<sup>th</sup>.

Yrs,
